

FlexAble Antibody Labeling Kits

Any antibody. Any color. Any time.

FlexAble is a novel antibody labeling kit that uses an affinity linker to conjugate fluorochromes, enzymes, and molecules in any buffer condition.

Compatible with primary antibodies from any supplier

Works with any antibody concentration and formulation

Fast and easy 2-step protocol – Ready to use in 10 minutes

Label as little as 0.5ug. No buffer exchange needed.

Label up to 50 different antibodies with 1 kit

No additional equipment required
